

Office of the National Coordinator
for Health Information Technology

**MAKE A
DIFFERENCE
AT ONC**

GET TO KNOW ONC

The Office of the National Coordinator for Health IT (ONC), part of the U.S. Department of Health and Human Services, is helping to transform the nation's healthcare system through policies, programs, and investments. Our vision is "better health enabled by data," which means all our work helps to advance the use and sharing of electronic health information to improve healthcare outcomes.

Created by executive order in 2004, we have made big strides in improving health care through market-shifting policies and initiatives that have dramatically changed how we share and use health information.

To help make an impact on health care through technology, come work at ONC! We seek to attract and develop skilled professionals in the standards, technology, policy, and healthcare fields. As a relatively young agency, we value a flexible and high-performing culture that welcomes new ideas and perspectives. Our strength is our willingness to take on big challenges through innovation and resourcefulness.

COMMON POSITIONS WITHIN ONC

Policy Analyst

Analyzes and evaluates policy, regulations, and legislation; monitors the effect these policies have on health technology adoption, electronic health information exchange, and interoperability.

Management and Program Analyst

Analyzes and evaluates Organizational Program Management and Administrative Operations. Performs limited studies of effectiveness of program and management practices/methods, and administrative operations.

Public Health Analyst

Analyzes and evaluates the effectiveness of program operations to define and solve problems for program managers. Manages and improves public health programs that affect healthcare providers and patients. Has responsibilities related to the initiation, management, and/or close-outs of grants, contracts, awards, and/or cooperative agreements.

IT Specialist

Analyzes projects for solutions of complex operational or policy issues in health IT areas such as: information security, information security reporting, quality assurance, health IT standards, interoperability, technical conformance and more. Stays abreast of standards and related processes that may impact future planning needs of the agency.

BEHIND THE SCENES

Get a feel for our ONC staff members and the work they do in our [‘Inside ONC’ blog series](#). The blogs introduce you to members of the ONC team, highlights the variety of positions inside the organization, and provides a snapshot of some of the diverse backgrounds that comprise our team.
